Location:

Pune, India

Customer Success:

- NetSuite supplies an agile, scalable growth platform for the recently launched global technology consulting firm focused on innovation in the finance, utilities, CPG, retail, technology and media/entertainment industries.
- Brillio has accelerated time to market by implementing NetSuite in 2014 after its spinoff from Collabera, a leading global IT and professional services company.
- NetSuite’s flexible cloud platform enabled Brillio to scale up its new business at a fraction of the time and cost of an on-premise ERP alternative, with lower ongoing total cost of ownership (TCO).
- With 2,000 employees, Brillio streamlines end-to-end processes with NetSuite Services Resource Planning, based on NetSuite OneWorld ERP.
- NetSuite OneWorld gives Brillio automated global financial consolidation and real-time visibility into three subsidiaries in India and the U.S.
- Brillio efficiently processes multi-currency transactions in the Indian rupee, and U.S. dollar, with ability to bring other currencies on board as needed.
- NetSuite provides integrated project and resource management, project accounting, and time and expense reporting covering 2,000 employees.
- Brillio has real-time visibility across roughly 400 projects under way at any given time to enhance utilisation, support profitability analysis, on-time delivery and client satisfaction.
- NetSuite timesheets have been standardised across subsidiaries to replace multiple time tracking systems, providing centralised visibility across projects.

“NetSuite is a key catalyst that helps Brillio run a flexible, dynamic business, and its agnostic cloud technology is valuable for integrations across our company.”

Brillio

Challenges:

- Brillio needed a more scalable solution with rapid deployment than the Microsoft Dynamics SL (Solomon) and Tally Solutions ERP systems used before Brillio spun off from Collabera.
- Company struggled with delays and inconsistent data with data scattered in multiple systems like Microsoft Dynamics SL used in the U.S., Tally Solutions in India and some part managed in excel sheets.
- Brillio wanted a scalable single system that can cater to current and future needs with customisation capabilities to model software to its business needs.

Solution:

- Selected over Oracle EBS and Microsoft Dynamics, NetSuite offered a unified platform for end-to-end visibility across a diverse global business.
- NetSuite’s modern cloud solution aligned well with Brillio’s focus on IT innovation and modernisation for its clients.
- Implementation by NetSuite Solution Provider Aashna Cloudtech Pvt Ltd of India helped ensure a top caliber cloud SRP platform for business growth.
